Table of Contents

<p>1 A brief introduction</p> <p>2 Water-borne resins and coatings: history, markets and definitions</p> <p>2.1 History of water-borne coatings and resins</p> <p>2.1.1 The past</p> <p>2.1.2 The present: from polymer science to resins</p> <p>2.1.3 The present: water-borne resins and coatings</p> <p>2.1.4 The future</p> <p>2.2 Markets and applications</p> <p>2.2.1 The market for water-borne coating resins</p> <p>2.2.2 Coatings market definitions</p> <p>2.3 Definitions</p> <p>2.3.1 Definitions of water-borne paints</p> <p>2.3.2 Definitions of water-borne resins</p> <p>2.3.3 Volatile Organic Compounds</p> <p>2.3.4 Polymer dispersion terminologies</p> <p>3 Polymer dispersions and emulsions</p> <p>3.1 General introduction</p> <p>3.2 Preparation of polymer dispersions</p> <p>3.2.1 Stability of polymer dispersions</p> <p>3.2.2 Free radical (co)polymerization mechanism</p> <p>3.2.3 Free radical emulsion (co)polymerization</p> <p>3.2.4 Raw materials: emulsion polymerization</p> <p>3.2.5 Process variation and morphology control</p> <p>3.2.6 Crosslinking of polymer dispersions</p> <p>3.2.7 Polymer dispersions made by other processes</p> <p>3.3 Parameters and mechanisms of polymer dispersions</p> <p>3.3.1 Particle size and particle morphology</p> <p>3.3.2 Glass transition temperature</p> <p>3.3.3 Film formation – coalescence</p> <p>3.3.4 Minimum film formation temperature (MFFT)</p> <p>3.3.5 Coalescing aids, cosolvents and plasticizers</p>	<p>3.3.6 Stabilization mechanism</p> <p>3.3.7 Rheology of polymer dispersions and paints</p> <p>3.3.8 Guideline formulations and performance</p> <p>3.4 Coating applications and formulations of polymer dispersions</p> <p>3.4.1 Paint formulation with polymer dispersion resins</p> <p>3.4.2 Styrene copolymer dispersions</p> <p>3.4.3 Styrene acrylic dispersions</p> <p>3.4.4 Pure acrylic dispersions</p> <p>3.4.5 Poly vinyl acetate and vinyl acetate copolymer dispersions</p> <p>3.4.6 Poly butadiene dispersions</p> <p>3.4.7 Cationic polymer dispersions</p> <p>3.5 References</p> <p>4 Alkyd resins</p> <p>4.1. Introduction</p> <p>4.2 Water-soluble alkyds</p> <p>4.2.1 Molecular structure of the resins</p> <p>4.2.2 Cosolvents</p> <p>4.2.3 Applications</p> <p>4.2.4 Examples</p> <p>4.3 Externally emulsified alkyds</p> <p>4.3.1 Molecular structure of the resins</p> <p>3.2. Anionic and nonionic modification</p> <p>4.3.3 Surfactants</p> <p>4.3.4 Technology</p> <p>4.3.5 Emulsification in theory and practice</p> <p>4.3.6 Applications</p> <p>4.3.7 Examples</p> <p>4.4 Internally emulsified alkyds</p> <p>4.4.1 Anionic and nonionic modification</p> <p>4.4.2 Molecular structure</p> <p>4.4.3 Applications</p> <p>4.4.4 Examples</p> <p>5 Epoxy Resins</p> <p>5.1 Background</p> <p>5.2 Basics</p> <p>5.3 Reaction and Cross-linking</p> <p>5.4 Epoxy-Dispersions</p> <p>5.5 Application</p> <p>5.6 Trends</p> <p>5.6.1 Epoxy Hybrids</p> <p>5.6.2 BPA substitutes, Biobased Epoxy Resins</p>	<p>6 Water-borne polyurethane coatings</p> <p>6.1 Introduction</p> <p>6.2 One component polyurethane coatings</p> <p>6.2.1 Synthesis of polyurethane dispersions</p> <p>6.2.2 Raw materials used for production of polyurethane dispersions</p> <p>6.2.3 Production process</p> <p>6.2.4 PUD producers</p> <p>6.2.5 Applications of polyurethane dispersions and coating formulations</p> <p>6.2.6 Automotive OEM applications</p> <p>6.2.7 Industrial wood applications</p> <p>6.2.8 Architectural: deco/DIY</p> <p>6.2.9 Automotive plastics</p> <p>6.2.10 Teletronics – industrial plastics</p> <p>6.2.11 Vehicle refinishing</p> <p>6.2.12 Metal</p> <p>6.3 Two-component polyurethane coatings</p> <p>6.3.1 Water-borne polyols and polyisocyanates for two component polyurethane coatings</p> <p>6.3.2 Coating applications of water-borne two component polyurethanes</p> <p>6.3.3 Paint formulation with acrylic emulsion resins</p> <p>6.3.4 Paint formulation with polyester emulsions</p> <p>6.4 References</p> <p>7 Silicone resins</p> <p>7.1 Silicone chemistry</p> <p>7.1.1 Structure of silicones</p> <p>7.1.2 Silicone resins</p> <p>7.1.3 Silanes, siloxanes and siliconates</p> <p>7.2 Silicone resin-based binders for coatings</p> <p>7.2.1 Silicone resin emulsions</p> <p>7.2.2 Performance profile of a binder</p> <p>7.3 Other silicone ingredients for water-borne coatings</p> <p>7.3.1 Hydrophobic primers</p> <p>7.3.2 Hydrophobic additives</p> <p>7.3.3 Special effect additives</p> <p>7.3.4 Silicone-based pH adjuster</p> <p>7.4 Silicone resin emulsion paints and plasters</p> <p>7.4.1 Definition of silicone resin emulsion paints and plasters</p>	<p>7.4.2 Properties of silicone resin paints and plasters</p> <p>7.4.3 Ingredients and formulation principles</p> <p>7.4.4 Selected formulations and properties</p> <p>7.5 Summary and outlook</p> <p>7.6 Literature</p> <p>8 Water-borne alkali silicates</p> <p>8.1 Historical background</p> <p>8.2 Chemical compositions</p> <p>8.3 Molecular structure of water-borne alkali silicates</p> <p>8.4 Production of alkali silicates</p> <p>8.5 Water-borne silicates</p> <p>8.5.1 Classification according to EU regulations</p> <p>8.5.2 Sodium silicates</p> <p>8.5.3 Potassium silicates</p> <p>8.5.4 Lithium silicates</p> <p>8.6 Curing or hardening processes of alkali silicates</p> <p>8.7 Water-borne alkali silicate containing surface coatings</p> <p>8.7.1 Silicate emulsion paint</p> <p>8.7.2 Silicate emulsion coatings for interior use</p> <p>8.8 Sol-silicate paint</p> <p>8.9 Organo-silicate paint</p> <p>8.10 Various applications of soluble silicates</p> <p>8.11 References</p> <p>9 Water-borne amino resins as hardeners</p> <p>9.1 Structure of amino resins</p> <p>9.2 Types and properties of amino resins</p> <p>9.3 Combination partners for amino resins</p> <p>9.4 Water-borne stoving enamels based on amino resins</p> <p>9.5 Formaldehyde free melamine-based resins</p> <p>9.6 Formulation examples</p> <p>9.7 Conclusion / comparison water-borne / solvent-borne stoving enamels</p> <p>9.8 Literature</p> <p>10 REACH and other regulations</p> <p>10.1 Legislation on volatile organic compounds</p> <p>10.2 Legislation on chemical substances 'REACH' and 'CLP'</p>

INSERTION ORDER

via E-Mail to: kristijan.lugaric@vincentz.net
via fax to: +49 511 9910-259

Yes, we would like to present our company
in the new technical book

RESINS FOR WATER-BORNE COATINGS

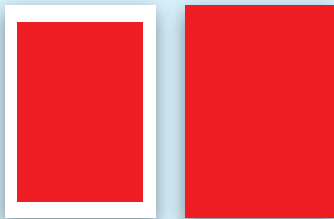

Jaap Akkerman + Dirk Mestach et al.

and order the following advertisement:

Print run:
min. 500
copies

1/1 page

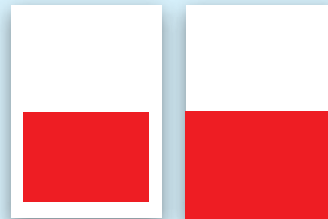

120 mm
x 180 mm
(type area)

or 155 mm
x 225 mm
(bleed size)

Position in the **front section** of the book:
→ between masthead, foreword, table of contents
4c € 1,990.00

Position in the **inner section** of the book:
→ any requested position/chapter possible!
4c € 2,390.00
→ in chapter (see Table of Contents): _____

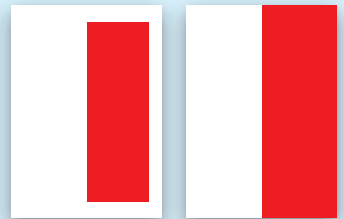

1/2 page horizontal

120 mm
x 85 mm
(type area)

or 155 mm
x 110 mm
(bleed size)

1/2 page vertical

57 mm
x 180 mm
(type area)

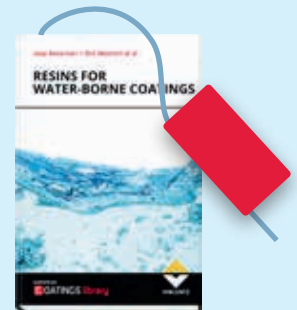

or 77 mm
x 225 mm
(bleed size)

Position in the **front section** of the book:
→ between masthead, foreword, table of contents
4c € 1,490.00

Bookmark
→ max. 60 mm x 120 mm
or max. 70 mm x 105 mm

excl. production € 2,390.00
 incl. production* € 2,890.00

*excl. artwork
(to be supplied by advertiser)
