ADAPTING TO CHANGE: THE ROLE OF THE COATINGS INDUSTRY IN A CHALLENGING ENVIRONMENT

**REGISTER
NOW!**

We are living in difficult times!

One challenge follows another and crisis mode holds us in a firm grip. It started with the global Covid-pandemic, through the disrupted supply chains worldwide – creating worry lines in raw material prices and availability – and a war in Europe. To what extent these events will fuel inflation and an energy crisis is not yet foreseeable.

It has always been possible to find a solution to challenging events and to take targeted measures – the European coatings industry has proven this several times. In this concentrated form, however, the number of challenges at the same time are appearing for the first time. It is an age of change.

At this year's CEPE Annual Conference under the motto

„Adapting to Change: The role of the coatings industry in a challenging environment“, current events will be evaluated and broken down to the coatings industry, the current and future impact as well as identifying the role of coatings industry in a constantly changing and challenging world. The presentations will provide impulses and food for thought, as well as initiate discussions to identify today necessary measures for tomorrow.

Join your peers at the CEPE Annual Conference in Madrid, Spain from 28 to 30 September 2022.

Do not miss the premium event of the European coatings industry as it will feature top-notch speakers and offer the platform to reconnect and discuss with your industry colleagues.
