

HOW TO CONTRIBUTE TO EUROPEAN COATINGS JOURNAL

GENERAL REMARKS

We always start out from the premise that we are allowed to publish what we receive. If you're not certain whether a particular subject is right for "European Coatings Journal", just contact us.

Receipt of your manuscript is acknowledged immediately, and within four weeks you'll know whether your article is going to be published and, if so, when. Once it has been accepted for publication, we are deemed to have acquired the right to use it in other of our publications and media, such as databanks, CD-ROM, on-line offers, internet.

We expect your article to make a real contribution towards promoting knowledge about the subject of the article and/or be of real practical use. It should not be written from an obviously advertising point of view. Trade names should be avoided wherever possible and be replaced by neutral terms.

The manuscript should have approx. 15,000 characters incl. blanks (we schedule 4 printed pages per article) and 8 graphic elements such as tables, illustrations, formulas or photographs. Please send all images in a separate file, in TIF or JPG version, minimum 300 dpi. Please also send the Excel tables that the graphs are based on. Manuscripts need to be written in English.

A full paper includes:

- Head
- Subhead
- Authors' name(s)
- Leader
- Main text
- Interlines
- Figures
- Tables
- Results at a glance
- Literature
- Contact details for corresponding author
- Application related photo

Previous or concurrent publication in any other journal (including those outside Germany) will render void this acceptance. Reprints are subject to our consent. The editors reserve the right to make reasonable amendments, abridgments, etc. The layout of the article and date of publication are subject to the editors' decision. By accepting the article for publication, we also acquire the right to use it in any form of electronic media.

The author declares that the rights of third parties are neither excluded nor in any way infringed or violated by the dissemination of the content of the article in any form whatsoever. Any claims against Vincentz Network arising from the disregard of this release by the author shall be enforceable against the author.
