COATINGS fire forum

HIGH PERFORMANCE PROTECTION COATINGS
6 – 7 November 2019
MADRID | SPAIN

www.european-coatings.com/fire
One of the most important hidden features of many goods and parts of buildings is to prevent flames to spread or buildings to collapse in case of fires. Everything to increase the time for rescue is crucial. Coatings play an important role here. They can give a foamy extra layer to steel bars in order to maintain their thermal integrity for a bit longer, or prevent the spreading of flames in a living room, once the candle set fire to the couch.

Building fires like the London Greenfell tower and more recently the Notre Dame in Paris underline the importance of having proper protection in place and there is still room for improvement.

The conference will deal with latest developments in flame retardancy and intumenscent coatings and will bring you up-to-date on testing methods as well as regulations.

**WHY YOU SHOULD ATTEND**

>> Understand the path forward in fire protection  
>> Get latest innovations in one place  
>> Meet the experts to discuss industry and potentially your issues

**SEE YOU IN MADRID!**
Welcome
Nina Musche, European Coatings Journal, Germany

SHORT COURSE
Flame retardant coatings: basics and new developments
Dr. Sabyasachi Gaan, Empa, Switzerland

Obtaining data from reaction to fire tests
Dr. Davood Zeinali, University of Ghent, Belgium

Discussion groups

Organic phosphorus compounds as flame retardants for coatings
Dr. Otto Mauerer, Lanxess, Germany

Preparation of phosphorus-nitrogen-carbon integrated flame retardant and its application in amino transparent fireproof coating
Xuelin Liu, Insa Rouen, France

Fire retardant coating from biomaterials
Vesa Kunnari, VTT Technical Research Centre of Finland, Finland

Networking dinner

Introduction
Nina Musche, European Coatings Journal, Germany

Reaction to fire: when you are trying to win a sprint not a marathon
Jens Ravensbaek, Teknos, Denmark

Fire retardant binders - nothing is impossible
Rolf Simon, Synthopol, Germany

Technology survey
Nina Musche, European Coatings Journal, Germany

Degradation of water-based intumescent coatings
Lars-Hendrik Daus, Federal Institute for Material Research and Testing (BAM), Germany

Case study: controlling fire in modern, well-insulated houses in the Netherlands
Krijn Leenderste, Allshield, The Netherlands

Flame retardant self-stratifying coating
Dr. Sophie Duquesne, University of Lille, France

Flame retardants for wood-coatings
Dr. Albert Jeyakumar, ICL-IP Flame Retardants, The Netherlands

Fire and corrosion protection in one coating
Michael Jackson, Ceramiccoats, Great Britain

Plus 2 HOT TOPICS
TBA

(subject to change)
GENERAL INFORMATION
HIGH PERFORMANCE PROTECTION COATINGS

VENUE
Hotel Meliá Avenida Américas
Calle de Juan Ignacio Luca de Tena 36
28027 Madrid, Spain
www.melia.com

ACCOMMODATION
Hotel accommodation is not included in the registration fee. We have arranged a room block for delegates at the Meliá Avenida América for a special single room rate of 135 € incl. breakfast and VAT. You will be sent a booking link together with your confirmation of registration which you can use to make a reservation until 1 November 2019.

REGISTRATION FEES
>> Early bird fee: 1.125 €
>> Standard fee: 1.345 €
>> Student: free of charge

Stated registration fees are net prices. Early bird until 18 September 2019. Hotel accommodation is not included in the registration fee.

THE FEE INCLUDES
>> Online proceedings
>> List of delegates
>> Networking evening
>> Lunch & coffee breaks

CANCELLATION POLICIES
Please refer to our website for full terms and conditions including our cancellation policy and deadlines.

WANT TO BE A SPONSOR?
>> Please contact anette.pennartz@vincentz.net for available options.
