# FIND WHAT YOU NEED, FAST

In today's fast-paced world, efficiency is everything. When it comes to finding the right suppliers, lab equipment, production machinery, and services, it can be time-consuming and overwhelming. That's why having a comprehensive and well-organised resource at your fingertips is essential.

The European Coatings Directory 2024-2025 offers just that: over 1,100 trusted suppliers, sorted by product category, supplier, or trade name. Additionally, this directory also uniquely compiles all coatings-related trade associations, universities, and institutes in one place, making it an essential tool for the industry in one handy reference.

The online version at [www.european-coatings.com/directory](http://www.european-coatings.com/directory) will help you make your search even more efficient.

Make the most of your time!

A handwritten signature in black ink that reads "Damir Gagro". The signature is fluid and cursive, written on a light-colored background.

## High-Performance Polymers for the Coatings Industry

### Wood Finishes

NEW PC-Mull® 815\*

Bio-based acrylic copolymer for industrial and residential wood applications with comparable performance to that of conventional 100% fossil-based products.

\*Calculated bio-based content of up to 15%

### Construction Coatings

EPS® 506

Acrylic copolymer for primers and topcoats on tiles and other mineral substrates with excellent efflorescence and chemical resistance.

### Floor-to-Roof Applications

EPS® 719

All-acrylic emulsion designed to minimize asphalt bleed-through in cool roof coatings while maintaining flexibility and toughness.

### Industrial Coatings

EPS® 595

Versatile and robust acrylic copolymer offering excellent corrosion resistance, early water resistance and adhesion to multiple substrates.

# DISCOVER SUSTAINABLE COATING INNOVATIONS

**POWERED BY  
ANTIMICROBIAL TECHNOLOGIES**

**Ready to enhance your coatings?** Microban's advanced antimicrobial technologies, LapisShield™ and Ascera™, offer ease of integration for manufacturers looking for more sustainable, high-performing solutions.

## **LAPISSHIELD** ANTIMICROBIAL TECHNOLOGY FOR WATER-BASED COATINGS

LapisShield is a **heavy-metal-free** antimicrobial designed for water-based coatings. The technology effectively inhibits bacteria, mould and mildew growth 24/7. LapisShield also eliminates common struggles associated with aggregation and sedimentation during the mixing and dispersing process, which reduces waste while maintaining efficiency.

## **ASCERA** NATURE-INSPIRED ANTIMICROBIAL FOR SOLVENT-BASED COATINGS

Ascera, inspired by nature\*, is a metal-free antimicrobial technology designed for solvent-based coatings. It provides long-lasting product protection against bacterial growth while being easy to incorporate, safe to handle, and offering strong chemical and UV stability.

## **WHY CHOOSE MICROBAN** PROTECTION FOR COATINGS?

As regulations tighten on antimicrobial chemistries, Microban is at the forefront of innovating sustainable technologies. Our years of dedicated research have led to the development of proven formulations that not only meet manufacturing needs but also maintain high quality and efficiency, setting the standard for the future of antimicrobial coatings.

[WWW.MICROBAN.COM](http://WWW.MICROBAN.COM)

## **WHO IS MICROBAN INTERNATIONAL?**

Microban International is home to the world's leading antimicrobial ingredient brands—Microban® and Ultra-Fresh®. We are a trusted partner to brands and manufacturers worldwide, empowering them to deliver meaningful product features with built-in antimicrobial protection.

Our technologies provide 24/7 defence against bacteria, mould, and mildew, ensuring products stay cleaner for longer. With the world's largest portfolio of antimicrobial additives, including metal-based and metal-free chemistries, we offer flexible solutions for industries ranging from automotive and building materials to healthcare and packaging.

# Siltech Corporation

## Your Technology – Our Chemistry

As an Innovation company, Siltech has built our business and reputation by creating new silicones for customers with new applications.

Using our proprietary technologies, Siltech develops, manufactures and markets a full line of organo-functional specialty silicone materials for specific customer applications. Siltech's track record of innovation and outside-of-the-box problem solving is demonstrated by our broad portfolio of product types. Our early history as an organic surfactant company gives us a different perspective from other silicone manufacturers and results in classic organic surfactant derivations to silicone such as Silamine®, Silphos® and Silquat® grades. With more than 30 years of experience, and two manufacturing facilities, we offer the coatings industry a broad line of Siltech additives and Silmer® reactive silicones as well as more unique chemistries.

In addition to our extensive portfolio, Siltech welcomes the opportunity to partner with customers to develop unique silicones for specific applications.

### Additives

Siltech inks & coatings additives have long been recognized as providing special properties including improved slip, gloss, mar resistance, flow, leveling and foam control. Furthermore, because these silicones are efficient at very low use levels, they are cost effective, and widely used.

Most recently from our labs we have commercialized Silsurf Bio additives with up to 70% new carbon and the performance of the original products.

### Silmer® Reactive Silicones

Our expertise in and portfolio of reactive silicones aligns with industry needs to bind into a coating as well as to modify resins to obtain hybrid mechanical properties. We have shown in many publications that Silmer reactive silicones can be reacted into films or resins to alter the properties of the final film. These materials increase flexibility, impact resistance, lower slip and CoF, as well as provide improved stain resistance. Please check our website for these references and updates.

Recently from our R&D labs we have created a family of highly cross-linked silicon-based polymers which provide unique properties. These include Silmer ACR DT-10 VQ which provide oleophobicity to UV cured acrylate coatings.

### R&D

Our R&D, Technical Service, Analytical and Process R&D laboratories are modern, well-equipped, co-located with our manufacturing facilities and staffed with first-class chemists and engineers.

See The Difference We Make

DCL Corporation is passionate about color. DCL is the leading innovator for organic & inorganic pigments and preparations for the coatings, plastics and ink industries. Thanks to our unparalleled heritage and customer service, DCL invites the world to “See the Difference We Make.”

Headquartered in Toronto, Canada, DCL Corporation operates manufacturing facilities in Canada, USA, the United Kingdom and The Netherlands, with dedicated R&D centers located at each site. That means DCL Corporation is large enough to compete on a global stage by servicing multi-national customers, while still being responsive to the needs of our small and medium-sized customers all over the world. We consistently go above and beyond to ensure each and every customer gets the pigment that matches their requirements.

At DCL, we’re more than just color. We’re committed to environmental, health and safety excellence for internal and external stakeholders. This stems from our focus on 100% customer satisfaction, innovation, and long-term sustainability. It’s what we like to call “the DCL difference.”

**CROHMIQ<sup>®</sup> Static Protective Type D FIBC** keep workers at paint and coatings factories safe from lethal electrostatic discharge accidents

Demand that all suppliers of bulk pigments and additives for your solvent processes only use genuine CROHMIQ<sup>®</sup> Type D FIBC packaging

**FOR WORKERS' SAFETY, DO NOT ALLOW SUBSTITUTIONS FOR CROHMIQ<sup>®</sup>**

*Safe Packaging Technologies for the 21st Century*

From our offices in North America and Europe, we direct and co-ordinate our customer service, manufacturing, and global distribution operations. We are committed to a high degree of quality in our procedures, processes and, most importantly, our people. As our products are used in safety critical applications, attention to detail, flexibility to meet customer needs, excellent service and support, and continuous technological improvement are always at the heart of our operations.

Texene product design is driven by customer requirements, which leads to innovative solutions such as our unique CROHMIQ<sup>®</sup> Static Protective Type D FIBC Fabrics.

Flexible intermediate bulk containers (FIBC) are the most cost-effective packaging and transport unit load systems, having many advantages for economies of scale and sustainability.

When FIBC are used to package materials for hazardous flammable environments, it is imperative to use the correct type of static protective FIBC to prevent incendiary electrostatic discharges causing fires and explosions.

For more than 25 years, CROHMIQ Static Protective FIBC has been the preferred choice for Type D bulk bag packaging for companies working with combustible or flammable powders, flammable gases or flammable solvents. Over 50 million CROHMIQ Type D FIBC have been used to safely package and protect over 100 billion pounds of materials.

Texene technical experts are available to provide in-person or online technical support to assist you in selecting and specifying the safe bulk bag packaging solution for your operations.

Please contact us to request support, or to find your local qualified CROHMIQ FIBC distributor.

Aluminium powders.....	57	Bentonite.....	64	<i>Amines, unspecified</i> .....	70	
Bronze pastes.....	57	Calcium carbide.....	64	Chlorinated hydrocarbons.....	70	
Fluorescent pigments.....	58	Calcium carbonate (CC), natural.....	64	<i>Dichloromethane (methylene chloride)</i> .....	70	
Gold bronze pastes.....	58	Calcium carbonate (CCP), precipitated.....	64	<i>Perchloroethylene</i> .....	70	
Gold bronze powders.....	58	Calcium sulphate (gypsum).....	65	<i>Trichloroethylene</i> .....	70	
Gold leaf.....	58	Cristobalite.....	65	<i>Chlorinated hydrocarbons, unspecified</i> .....	70	
Holographic pigments.....	58	Dolomite (CaMgCO <sub>3</sub> ).....	65	Co-solvents.....	71	
Lead powders.....	58	Feldspar.....	65	Esters.....	71	
Liquid crystal pigments.....	58	Fibrous fillers.....	65	<i>Butyl acetate</i> .....	71	
Magnetic pigments.....	58	Fillers for flame resistant systems.....	65	<i>Ethyl acetate</i> .....	71	
Metallic pigments.....	58	Glass beads.....	65	<i>Ethyl ester</i> .....	71	
Micaceous iron ore.....	58	Glass dust.....	65	<i>Isopropyl acetate</i> .....	71	
Micronised titanium dioxide.....	58	Glass fibres.....	65	<i>Propyl acetate</i> .....	71	
Pearlescent pigments.....	58	Graphite.....	65	<i>Esters, unspecified</i> .....	71	
Phosphorescent pigments.....	58	Hollow microspheres.....	65	Ethers.....	71	
Silver flakes.....	59	Kaolin.....	66	<i>Isopropyl ether</i> .....	71	
Special effect mica.....	59	Kieselgur.....	66	<i>Ethers, unspecified</i> .....	71	
Stainless steel powders.....	59	Lightweight fillers.....	66	Glycol ether acetates.....	71	
Metal pastes, unspecified.....	59	Magnesium oxides and hydroxides.....	66	Glycol ethers.....	71	
Special effect pigments, unspecified.....	59	Marble.....	66	Glycols.....	72	
Functional pigments.....	59	Mica.....	66	<i>Butyl diglycol and its derivatives</i> .....	72	
Anti-corrosive pigments.....	59	Perlite.....	67	<i>Butyl glycol and its derivatives</i> .....	72	
<i>Chromate pigments</i> .....	59	Plastic microspheres.....	67	<i>Diethylene glycol and its derivatives</i> .....	72	
<i>Lead pigments</i> .....	59	Polyamide powder.....	67	<i>Diglycol and its derivatives</i> .....	72	
<i>Micaceous iron ore</i> .....	59	Quartz.....	67	<i>Ethyl glycol and its derivatives</i> .....	72	
<i>Phosphate pigments</i> .....	59	Silica.....	67	<i>Ethylene glycol and its derivatives</i> .....	72	
<i>Red lead</i> .....	59	Silica flour.....	67	<i>Hexyl glycol</i> .....	72	
<i>Zinc dust</i> .....	59	Silica gel.....	67	<i>Isopropyl glycol</i> .....	72	
<i>Anti-corrosive pigments, unspecified</i> .....	59	Silica sand.....	67	<i>Methyl diglycol</i> .....	72	
Conductive pigments.....	60	Silicate fillers.....	67	<i>Methyl glycol and its derivatives</i> .....	72	
Functional pigments, unspecified.....	60	Siliceous chalk.....	67	<i>Polyglycol</i> .....	72	
Pigment preparations.....	60	Silicic acid.....	67	<i>Propylene glycol and its derivatives</i> .....	72	
Flushed pigments.....	60	Silicon carbide.....	68	<i>Triethylene glycol</i> .....	72	
Hybrid pigment preparations, unspecified.....	60	Silicon dioxide.....	68	<i>Triglycol</i> .....	73	
Pigment dispersions (in paste form).....	60	Slate flour.....	68	<i>Glycols, unspecified</i> .....	73	
<i>Pigment dispersions (in paste form), non-water-based</i> .....	60	Talc (hydrated magnesium silicate).....	68	Hydrocarbons.....	73	
<i>Pigment dispersions (in paste form), water-based</i> .....	60	Wollastonite (calcium metasilicates).....	68	<i>Hydrocarbons, aliphatic</i> .....	73	
<i>Pigment dispersions (in paste form), unspecified</i> .....	61	Zeolites.....	68	<i>Hydrocarbons, aromatic</i> .....	73	
Pigment preparations (dry), anorganic unspecified.....	61	Fillers, unspecified.....	68	<i>Hydrocarbons, cycloaliphatic</i> .....	73	
Pigment preparations (dry), organic unspecified.....	61	<b>SOLVENTS</b>			<i>Hydrocarbons, unspecified</i> .....	73
Pigment preparations, low-viscous.....	61	Alcohols.....	69	Ketones.....	73	
Tinting pastes.....	61	<i>Allyl alcohol</i> .....	69	<i>Acetone</i> .....	73	
<i>Tinting pastes for automotive paints</i> .....	61	<i>Aminoalcohol</i> .....	69	<i>Cyclohexanone</i> .....	73	
<i>Tinting pastes for industrial coatings</i> .....	61	<i>Benzyl alcohol</i> .....	69	<i>Diisobutyl ketone</i> .....	73	
<i>Tinting pastes for masonry paints</i> .....	62	<i>Butanol</i> .....	69	<i>Ethyl amyl ketone</i> .....	73	
		<i>Butyl alcohol</i> .....	69	<i>Ethylene carbonate</i> .....	73	
		<i>Diacetone alcohol</i> .....	69	<i>Isophorone</i> .....	73	
		<i>Ethanol</i> .....	69	<i>Methyl ethyl ketone</i> .....	73	
				<i>Methyl isobutyl ketone</i> .....	74	
				<i>Methyl propyl ketone</i> .....	74	

*Propylene carbonate*.....74  
*Ketones, unspecified*.....74  
 Light naphtha.....74  
 Reactive thinners.....74  
 Solvent blends.....74  
 Special petroleum.....74  
 Terpene hydrocarbons.....74  
 White spirits.....74  
 Solvents, unspecified.....74

**ADDITIVES**

Adhesion promoters.....75  
 Additives for heat seal coatings.....75  
 Algicides.....75  
 Anti-blocking additives.....75  
 Anti-cratering additives.....76  
 Anti-flotation additives.....76  
 Anti-foam additives.....76  
 Anti-fouling compounds.....77  
 Anti-freeze additives.....77  
 Anti-graffiti additives.....77  
 Anti-oxidants.....77  
 Anti-sedimentation additives.....77  
 Anti-skinning additives.....78  
 Anti-stain additives.....78  
 Anti-static additives.....78  
 Anti-thickening additives.....78  
 Bactericides.....78  
 Additives for barrier coatings.....79  
 Blueing protective additives.....79  
 Brighteners, optical.....79  
 Catalysts.....79  
 Coalescents.....79  
 Conductive additives.....79  
 Corrosion inhibitors.....80  
 Crosslinking additives.....80  
 Degassing additives.....80  
 Dispersing additives.....81  
 Driers.....81  
 Emulsifying additives.....82  
 Extreme temperature protection additives.....82  
 Flame retardants.....82  
 Flocculating additives.....82  
 Fungicides.....82  
 Gelling additives.....82  
 Gloss enhancing additives.....83  
 Hammertone additives.....83  
 Lecithin.....83  
 Levelling agents.....83  
 Light stabilizers.....83  
 Lubricants.....84  
 Matting agents.....84  
 Non-stick additives.....84  
 Open time additives.....84  
 Photoinitiators.....84  
 Preservatives.....85  
 Radical scavengers.....85  
 Reducing agents.....85  
 Release additives.....85  
 Rheological additives.....85  
 Sag control additives.....86  
 Sandability improvers.....86

Scratch resistance improvers.....86  
 Siccatives.....87  
 Slip additives.....87  
 Soft-feel additives.....87  
 Stabilizers.....87  
 Surfactants.....88  
 Thickeners.....88  
 Thixotropic additives.....89  
 Toughening agents.....89  
 UV absorbers (UV stabilizers).....89  
 Viscosity stabilizers.....89  
 Water repellents.....90  
 Waxes.....90  
 Wetting additives.....90  
 Xanthan gum.....91  
 Additives, unspecified.....91

**LABORATORY AND PRODUCTION**

**LABORATORY AND PRODUCTION EQUIPMENT**

Anti-static dust cloths.....92  
 Automatic cleaning equipment.....92  
 Bag filters.....92  
 Ball mills.....92  
 Basket mills.....92  
 Bead mills.....92  
 Can-closing machines.....92  
 Centrifuges.....92  
 Classifiers.....92  
 Cleaning apparatus.....92  
 Cleaning plants.....92  
 Comminuting machines.....92  
 Compounding machines.....92  
 Compressed-air systems.....92  
 Compressors.....93  
 Container-cleaning systems.....93  
 Containers.....93  
 Control engineering plants.....93  
 Conveyor systems.....93  
 Cooled belt systems.....93  
 Corundum disc mills.....93  
 Diaphragm pumps.....93  
 Dispensing equipment and systems.....93  
 Dispersers.....94  
 Dispersing machines.....94  
 Dispersing units.....94  
 Dissolver discs.....94  
 Dissolvers.....94  
 Driers.....95  
 Drum pumps.....95  
 Drum-cleaning systems.....95  
 Drum-filling systems.....95  
 Drying cabinets.....95  
 Drying ovens.....95  
 Dust control systems.....95  
 Dust removal units.....95  
 Emptying systems.....95  
 Extruders.....95  
 Filling machineries.....96  
     *Large batches*.....96  
     *Minimum quantities*.....96  
     *Pilot plants*.....96  
     *Filling machineries, unspecified*.....96

Filling plants.....96  
 Filling system valves.....96  
 Filling systems.....96  
 Filter bags.....96  
 Filter systems.....96  
 Filters.....97  
 Flowmeters.....97  
 Glass beads.....97  
 Grinding balls.....97  
 Grinding equipment.....97  
 Homogenising machines.....97  
 Hose pumps.....97  
 Hoses.....97  
 Industrial vacuum systems.....98  
 In-plant paint mixing machines.....98  
 Kneaders.....98  
 Labelling machines.....98  
 Laboratory ball mills.....98  
 Laboratory bead mills.....98  
 Laboratory dissolvers.....98  
 Laboratory extruders.....98  
 Laboratory mechanically agitated ball mills.....98  
 Laboratory mixers.....98  
 Laboratory triple roller mills.....99  
 Level-measuring systems.....99  
 Liquid containers.....99  
 Mechanical stirrers.....99  
 Mechanically agitated ball mills.....99  
 Mechanically agitated mills.....99  
 Metal containers.....99  
 Mills and grinding equipment.....99  
 Mixers, mixing apparatus, mixing machines.....99  
 Mixing and metering units.....100  
 Mixing balances.....100  
 Mixing beakers.....100  
 Mixing systems.....100  
 Packaging.....100  
 Packaging containers.....100  
 Packaging machines.....101  
 Packaging plants.....101  
 Paint can opener.....101  
 Paint formulation systems.....101  
 Paint mills.....101  
 Paint mixing machines.....101  
 Palleting equipment.....101  
 Paste filling machines.....101  
 Paste stirrers.....101  
 Pig cleaning systems.....101  
 Pigging technology.....101  
 Pigment dispersing units.....101  
 Planetary dissolvers.....101  
 Planetary mixers.....102  
 Planetary roller extruders.....102  
 Plant maintenance.....102  
 Plant/apparatus construction.....102  
 Plastic closures.....102  
 Plastic containers.....102  
 Polymerisation plants.....102  
 Powder coating mills.....102  
 Powder metering equipment.....102  
 Production monitoring systems.....102

# EC ACADEMY

Your e-learning platform in coatings

Get informed now!

Discover our new e-learning platform for the coatings industry! We understand that everyone learns differently. That's why the EC Academy offers bite-sized learning modules that allow you to enhance your knowledge and skills at your own pace, whether you're in the office, at home, or on the go.

- » Engaging videos presented by renowned industry experts that enable bite-sized learning at your own pace.
- » Maximum flexibility! The EC Academy enables learning to take place anywhere in the world, whenever it is convenient - even on the move.
- » The first course Elementary Classes is already online! More courses will follow soon.
